

NCERT: 11.9.3.2

EE23BTECH11040 - Manoj Kumar Ambatipudi*

QUESTION: Find the 12th term of a G.P. whose 8th term is 192 and common ratio is 2.

SOLUTION:

Variable	Description	value
r	common ratio	2
$x(7)$	eighth term	192
$x(n)$	General term of sequence	None
$X(z)$	Z-Transform Equation	None

TABLE 1

VARIABLES USED AND THEIR DESCRIPTIONS

General term can be written as

$$x(n) = x(0) r^n u(n) \quad (1)$$

Now on Z-transforming, we get

$$X(z) = \frac{x(0)}{1 - rz^{-1}} \quad |z| > |r| \quad (2)$$

Referring to Table ??

$$x(7) = 192 \quad (3)$$

$$\Rightarrow x(0) 2^7 = 192 \quad (4)$$

$$\Rightarrow x(0) = \frac{3}{2} \quad (5)$$

The general term is written as (1)

$$x(n) = \frac{3}{2} \times 2^n u(n) \quad (6)$$

From (2) and Table 1, we get

$$X(z) = \frac{3}{1 - 2z^{-1}} \quad |z| > 2 \quad (7)$$

From Table 1

$$x(11) = 1.5 \times 2^{11} = 3072 \quad (8)$$
